PETITION UNDER 37 CFR §1.47(a)

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Applicants petition to file the above-referenced application under 37 CFR §1.47(a) to make application on behalf of themselves and on behalf of the nonsigning inventors: Jafar Nabkel and Edward A. Youngs.

A Declaration of Irvin E. Branch, which includes the last known address of Inventors Jafar Nabkel and Edward A. Youngs is provided herewith in support of this Petition.

DECLARATION OF IRVIN E. BRANCH
IN SUPPORT OF PETITION UNDER 37
C.F.R. §1.47(a)

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

I, Irvin E. Branch, am an attorney at Townsend and Townsend and Crew LLP ("TTC"), representing Qwest Communications International Inc. ("Qwest") in the above-referenced patent application.

I hereby declare certain facts surrounding the signing of Declarations of Prior Invention under 37 CFR §1.131 by Inventors Donald E. Gillespie, Jafar Nabkel, Harvey J. Benson, Matthew Jacobs, acting Representative of Karen Siegel-Jacobs and Edward A. Youngs.

At least the following steps have been taken to obtain Inventor Nabkel and Jacob's signatures:

- On August 27, 2005 Attorney for Applicants caused to be mailed via certified mail, return receipt requested, Declarations of Prior Invention under 37 CFR §1.131 to the last known address for Inventors: Donald E. Gillespie, Jafar Nabkel, Harvey J. Benson, Matthew Jacobs, acting Representative of Karen Siegel-Jacobs, and Edward A. Youngs.
- Attorney for Applicants received envelopes marked "Not Deliverable as Addressed, Unable to Forward" for Inventors Nabkel and Youngs. Inventors Nabkel and Youngs are no longer employees of Assignee and Assignee has no other forwarding address in their personnel records. We have been unable to locate them after diligent effort. Copies of the returned envelopes are attached hereto as Exhibit A. The last known address for Inventor Nabkel is: 1630 30th Street, #603, Boulder, CO 80301. The last known address for Inventor Youngs is: 4791 Franklin Drive, Boulder, CO 80301.
- Attorney for Applicants caused to be searched the DEX Yellow Pages for listings for Inventors Nabkel and Youngs in the city of the last known address, as well as surrounding cities. Copies of the DEX Yellow Pages listings are attached hereto as Exhibit B. We were unable to locate any listings for Inventors Nabkel and Youngs.

The undersigned, being hereby warned that willful false statements and the like so made are punishable by fine or imprisonment or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the patent application or any patent resulting therefrom, declare that I am authorized to execute this instrument on behalf of applicants; all statements made of my own

knowledge are true; and all statements made on information and belief are believed to be true.

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION PURSUANT TO 37 C.F.R. §1.131

Sir:

I, Donald E. Gillespie, declare as follows:

1. I am a co-inventor of the subject matter of the referenced patent application.

2. Prior to September 20, 1999, I participated in the conception of the subject matter of the above-described application (hereinafter "the invention"), as evidenced by Exhibits A through B. Exhibit A is an Invention Disclosure signed by all inventors and three witnesses. Exhibit B is a letter dated August 13, 1999, forwarding that disclosure to outside counsel instructing preparation of the subject patent application.

3. From at least a date prior to September 20, 1999, and continuing until November 18, 1999, the constructive reduction to practice of the invention, the inventors were diligent in reducing this invention to practice by, among other things, reviewing the draft patent application provided by outside counsel on October 4, 1999, as evidenced by Exhibit C.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the above-referenced application or a patent issued therefrom.

Respectfully submitted,

Donald E. Gillespie

INVENTION DISCLOSURE

DIRECTIONS

Complete EVERY ITEM. If any item is not applicable or unknown, please indicate.

All inventors should sign the form (Item 14), as well as two witnesses (Item 15) and your supervisor (Item 16).

Send the completed, ORIGINAL form to the U S WEST Law Department - Intellectual Property Group, 7800 East Orchard Road, Suite 490, Englewood, CO 80111. You may FAX the form (FAX No. 303-793-6563), but please also send the original. If you have any questions, contact the Law Department at 303-793-6276 or 303-796-6030.

Since patent rights can be lost by public disclosure, please keep your invention confidential until advised otherwise by the Law Department.

- (1) **Invention Title.** Give a short (10 words or less) descriptive title of the invention.

A location-sensitive method and system for providing call management services to a mobile subscriber.

- (2) **Invention Summary.** State what you regard as the key invention concept (30 words or less).

Mobile phone subscribers could be provided with call management services that are sensitive to their current geographic location; e.g., a Do Not Disturb feature that is automatically activated when subscribers are near their residence.

- (3) **Purpose and Problems Solved.** Briefly state why the invention was developed, what problems it solves and the advantages it has over existing products or processes.

With the emerging PCS networks, mobile phone subscribers are more "in touch". One Number Services allow subscribers to be reached wherever they physically are. At the same time, mobile handsets can be used for both personal and work purposes. This continuous

CONFIDENTIAL - ATTORNEY/CLIENT PRIVILEGED

communications, however, may result in too many calls to some subscribers and an encroachment on the subscribers' personal or work life.

This invention describes a method and system to provide call management services that operate based on the location of the subscriber's mobile handset. Call Management services include, for example, Do Not Disturb, call screening, caller identification, special billing arrangements, or call forwarding types of services.

- (4) **Description.** Describe the invention and/or attach a description, drawing(s), flow chart(s) and/or diagram(s), if available.

The following diagram shows a wireless network comprised of a wireless handset, a pair of base stations (BS), a mobile switch, and a (pair of) Wireless Service Location Registers (WSLR)TM. The WSLR is described elsewhere, but for the purposes of this invention, it is a network computer containing both Home Location Register (HLR) applications and Location Management applications. The mobile switch may consist of numerous components, including a Base Station Controller, a Mobile Switching Center, and a Visiting Location Register.

The handsets communicate with Base Stations using radio frequencies. Two common digital protocols for this radio connectivity are Code Division Multiplexed Access (CDMA) and Time Division Multiplexed Access (TDMA). The Base Stations communicate with the mobile switch using a base station protocol such as IS-634 or similar. The mobile switch communicates with the WSLR using a signaling protocol such as IS-41 or GSM MAP.

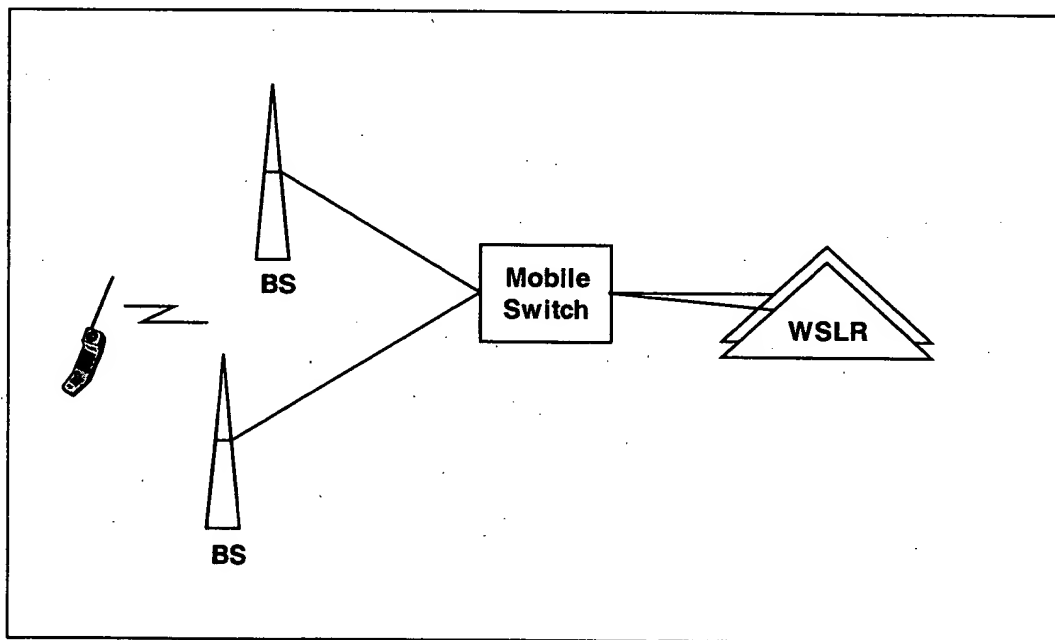

Figure 1: System for Providing Location-Sensitive Services

The method disclosed here teaches that call management services may be applied to incoming calls to the subscriber's handset or to outgoing calls from the subscriber's handset. Handset location information is either: 1) continuously furnished to the WSLR from either the network or from the subscriber's handset, or 2) provided to the WSLR upon request. This location

information may be determined from a variety of techniques well described elsewhere. Two examples are triangulation of radio signals by the base stations or using Global Positioning Systems (GPS) receivers located in mobile handsets.

When incoming calls are placed to the subscriber's handset, a signal (e.g., Location Request) is sent from the mobile switch to the WSLR requesting instructions on how to route the call. The WSLR accesses internal customer profiles to determine if the subscriber's handset is presently located within a geographic region where call management services for that subscriber apply. If so, the WSLR responds to the mobile switch with call processing instructions. For example, a Do Not Disturb service may instruct the switch to present an announcement to calling party stating that the subscriber is unavailable to receive calls at the moment.

When outgoing calls are placed from the subscriber's handset, a signal (e.g., Origination Request) is sent from the mobile switch to the WSLR requesting instructions on how to route the call. The WSLR accesses internal customer profiles to determine if the subscriber's handset is presently located within a geographic region where call management services for that subscriber apply. If so, the WSLR responds to the mobile switch with call processing instructions. For example, a caller identification service may replace the handset's caller identification with the subscriber's office telephone number when the handset is in the vicinity of the subscriber's office location.

Subscribers may specify the geographic regions where call management services apply in a number of ways. Some ways are by specifying a radius from specific point, a latitude/longitude grid, a list of ZIP codes, or a list of census tracts. This specification can be accomplished several techniques, including manual specification, use of Geographic Informations Systems (GIS), or by automated entry from the handset. An example of the first technique might be supplying a list of ZIP codes to the WSLR operator. An example of the second technique might be outlining a rectangle using a map over a Web-based GIS. An example fo the third technique might be pressing a key on the handset to identify a one-kilometer radius circle from the subscribers current location.

(5) **Business Area.** Check the business area that best fits your invention.

(6) **Responsible U S WEST Entity.** Provide the name of the U S WEST Division/Subsidiary having responsibility for the invention. This is usually the organization in which the inventor (or majority of inventors) is employed.

U S WEST Advanced Technologies

(7) **U S WEST Project Name or No.**

- a. Under what U S WEST project name or number was work done which resulted in the invention?

b. If the project was funded by organization(s) other than the responsible organization in Item 6 above, please name that organization(s).

- (8) **Conception Date.** When was the invention first conceived? Please list any records (engineering notebook, memos, etc.) which establish such conception.

The invention was first discussed on [REDACTED] Documented in Integrated Services Architecture subgroup meeting.

- (9) **Prototype or Model.** Has a prototype/model been built? If so, when was it built and where is it now?

No prototype or model has been constructed yet.

- (10) **Related Items.** Are there any existing products, processes, patents or U S WEST invention disclosures similar or which may relate to the invention? If so, please list them.

U S WEST has a patent on Do Not Disturb, and Remote Access to Call Forwarding. The WSLR has been described in several patents including Integrated Wireline/Wireless services, Generic C architecture, and Answer/Disconnect supervision.

- (11) **Sale or Public Use.** Has this invention been sold, offered for sale or publicly used (field trial, etc.) or is such sale or use anticipated? If so, please supply actual or anticipated dates.

The product has not been offered to the public yet.

- (12) **Publication or Disclosure.** Has the invention been disclosed in a publication or disclosed to anyone outside U S WEST or is such disclosure or publication anticipated? If so, supply actual or anticipated dates.

No.

- (13) **Commercial Value.** Briefly outline the potential commercial value of the invention (e.g., likelihood of use by others, licensing potential, etc.).

The commercial value to U S WEST lies with a potential commercial offering of location-sensitive services. With the patent application, U S WEST may choose to license the intellectual property to other equipment suppliers, to other network operators, or to retain exclusive marketing rights to the services.

RE: U.S. Patent Application for:
"METHOD AND SYSTEM FOR PROVIDING LOCATION-SENSITIVE CALL
MANAGEMENT SERVICES TO A MOBILE SUBSCRIBER"
Your Ref. No.: 1674
Our Ref. No.: 60,434-002;

[REDACTED]

Dear Jafar:

I have enclosed a draft of the above-identified patent application for review by you as well as your co-inventors, including informal drawings to expedite the review process. Formal drawings will be prepared prior to filing the Application.

Please carefully review the application at your earliest convenience for accuracy and completeness. Keep in mind that we must disclose the best mode known for practicing the invention at the time of filing. Under the law, the best mode must further be disclosed in a way that would enable one of ordinary skill in the art to practice the invention without undue experimentation.

Mr. Jafar Nabkel

October 4, 1999

DECLARATION PURSUANT TO 37 C.F.R. §1.131

Sir:

I, Harvey J. Benson, declare as follows:

1. I am a co-inventor of the subject matter of the referenced patent application.

2. Prior to September 20, 1999, I participated in the conception of the subject matter of the above-described application (hereinafter "the invention"), as evidenced by Exhibits A through B. Exhibit A is an Invention Disclosure signed by all inventors and three witnesses. Exhibit B is a letter dated August 13, 1999, forwarding that disclosure to outside counsel instructing preparation of the subject patent application.

3. From at least a date prior to September 20, 1999, and continuing until November 18, 1999, the constructive reduction to practice of the invention, the inventors were diligent in reducing this invention to practice by, among other things, reviewing the draft patent application provided by outside counsel on October 4, 1999, as evidenced by Exhibit C.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the above-referenced application or a patent issued therefrom.

Respectfully submitted,

Harvey J. Benson

INVENTION DISCLOSURE

DIRECTIONS

Complete EVERY ITEM. If any item is not applicable or unknown, please indicate.

All inventors should sign the form (Item 14), as well as two witnesses (Item 15) and your supervisor (Item 16).

Send the completed, ORIGINAL form to the U S WEST Law Department - Intellectual Property Group, 7800 East Orchard Road, Suite 490, Englewood, CO 80111. You may FAX the form (FAX No. 303-793-6563), but please also send the original. If you have any questions, contact the Law Department at 303-793-6276 or 303-796-6030.

Since patent rights can be lost by public disclosure, please keep your invention confidential until advised otherwise by the Law Department.

(1) **Invention Title.** Give a short (10 words or less) descriptive title of the invention.

A location-sensitive method and system for providing call management services to a mobile subscriber.

(2) **Invention Summary.** State what you regard as the key invention concept (30 words or less).

Mobile phone subscribers could be provided with call management services that are sensitive to their current geographic location; e.g., a Do Not Disturb feature that is automatically activated when subscribers are near their residence.

(3) **Purpose and Problems Solved.** Briefly state why the invention was developed, what problems it solves and the advantages it has over existing products or processes.

With the emerging PCS networks, mobile phone subscribers are more "in touch". One Number Services allow subscribers to be reached wherever they physically are. At the same time, mobile handsets can be used for both personal and work purposes. This continuous

CONFIDENTIAL - ATTORNEY/CLIENT PRIVILEGED

communications, however, may result in too many calls to some subscribers and an encroachment on the subscribers' personal or work life.

This invention describes a method and system to provide call management services that operate based on the location of the subscriber's mobile handset. Call Management services include, for example, Do Not Disturb, call screening, caller identification, special billing arrangements, or call forwarding types of services.

- (4) **Description.** Describe the invention and/or attach a description, drawing(s), flow chart(s) and/or diagram(s), if available.

The following diagram shows a wireless network comprised of a wireless handset, a pair of base stations (BS), a mobile switch, and a (pair of) Wireless Service Location Registers (WSLR)TM. The WSLR is described elsewhere, but for the purposes of this invention, it is a network computer containing both Home Location Register (HLR) applications and Location Management applications. The mobile switch may consist of numerous components, including a Base Station Controller, a Mobile Switching Center, and a Visiting Location Register.

The handsets communicate with Base Stations using radio frequencies. Two common digital protocols for this radio connectivity are Code Division Multiplexed Access (CDMA) and Time Division Multiplexed Access (TDMA). The Base Stations communicate with the mobile switch using a base station protocol such as IS-634 or similar. The mobile switch communicates with the WSLR using a signaling protocol such as IS-41 or GSM MAP.

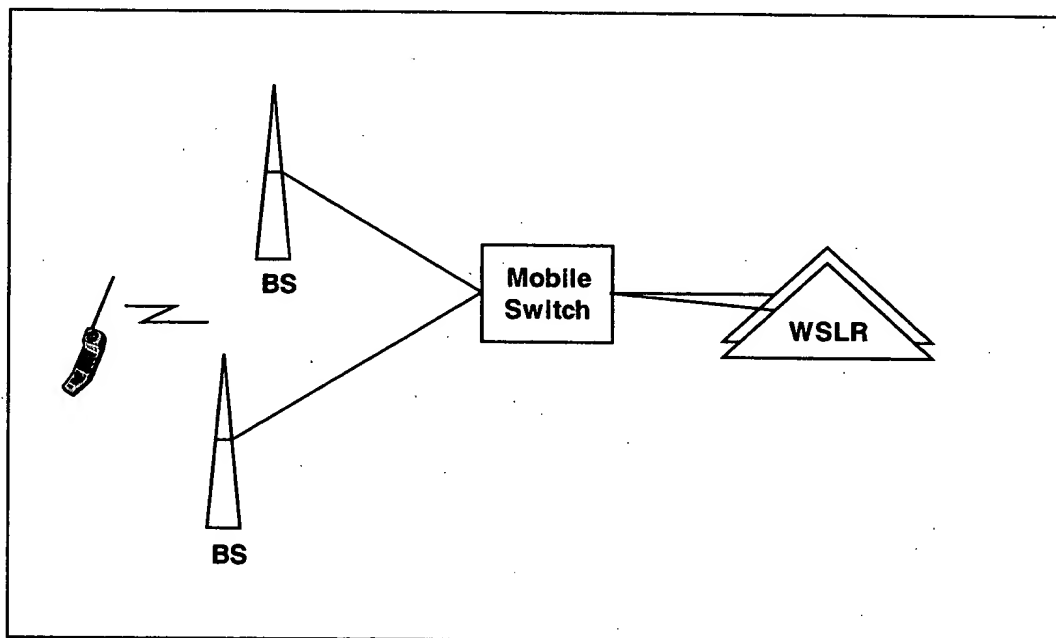

Figure 1: System for Providing Location-Sensitive Services

The method disclosed here teaches that call management services may be applied to incoming calls to the subscriber's handset or to outgoing calls from the subscriber's handset. Handset location information is either: 1) continuously furnished to the WSLR from either the network or from the subscriber's handset, or 2) provided to the WSLR upon request. This location

information may be determined from a variety of techniques well described elsewhere. Two examples are triangulation of radio signals by the base stations or using Global Positioning Systems (GPS) receivers located in mobile handsets.

When incoming calls are placed to the subscriber's handset, a signal (e.g., Location Request) is sent from the mobile switch to the WSLR requesting instructions on how to route the call. The WSLR accesses internal customer profiles to determine if the subscriber's handset is presently located within a geographic region where call management services for that subscriber apply. If so, the WSLR responds to the mobile switch with call processing instructions. For example, a Do Not Disturb service may instruct the switch to present an announcement to calling party stating that the subscriber is unavailable to receive calls at the moment.

When outgoing calls are placed from the subscriber's handset, a signal (e.g., Origination Request) is sent from the mobile switch to the WSLR requesting instructions on how to route the call. The WSLR accesses internal customer profiles to determine if the subscriber's handset is presently located within a geographic region where call management services for that subscriber apply. If so, the WSLR responds to the mobile switch with call processing instructions. For example, a caller identification service may replace the handset's caller identification with the subscriber's office telephone number when the handset is in the vicinity of the subscriber's office location.

Subscribers may specify the geographic regions where call management services apply in a number of ways. Some ways are by specifying a radius from specific point, a latitude/longitude grid, a list of ZIP codes, or a list of census tracts. This specification can be accomplished several techniques, including manual specification, use of Geographic Informations Systems (GIS), or by automated entry from the handset. An example of the first technique might be supplying a list of ZIP codes to the WSLR operator. An example of the second technique might be outlining a rectangle using a map over a Web-based GIS. An example fo the third technique might be pressing a key on the handset to identify a one-kilometer radius circle from the subscribers current location.

(5) **Business Area.** Check the business area that best fits your invention.

(6) **Responsible U S WEST Entity.** Provide the name of the U S WEST Division/Subsidiary having responsibility for the invention. This is usually the organization in which the inventor (or majority of inventors) is employed.

U S WEST Advanced Technologies

(7) **U S WEST Project Name or No.**

- a. Under what U S WEST project name or number was work done which resulted in the invention?

b. If the project was funded by organization(s) other than the responsible organization in Item 6 above, please name that organization(s).

- (8) **Conception Date.** When was the invention first conceived? Please list any records (engineering notebook, memos, etc.) which establish such conception.

The invention was first discussed on [REDACTED] Documented in Integrated Services Architecture subgroup meeting.

- (9) **Prototype or Model.** Has a prototype/model been built? If so, when was it built and where is it now?

No prototype or model has been constructed yet.

- (10) **Related Items.** Are there any existing products, processes, patents or U S WEST invention disclosures similar or which may relate to the invention? If so, please list them.

U S WEST has a patent on Do Not Disturb, and Remote Access to Call Forwarding. The WSLR has been described in several patents including Integrated Wireline/Wireless services, Generic C architecture, and Answer/Disconnect supervision.

- (11) **Sale or Public Use.** Has this invention been sold, offered for sale or publicly used (field trial, etc.) or is such sale or use anticipated? If so, please supply actual or anticipated dates.

The product has not been offered to the public yet.

- (12) **Publication or Disclosure.** Has the invention been disclosed in a publication or disclosed to anyone outside U S WEST or is such disclosure or publication anticipated? If so, supply actual or anticipated dates.

No.

- (13) **Commercial Value.** Briefly outline the potential commercial value of the invention (e.g., likelihood of use by others, licensing potential, etc.).

The commercial value to U S WEST lies with a potential commercial offering of location-sensitive services. With the patent application, U S WEST may choose to license the intellectual property to other equipment suppliers, to other network operators, or to retain exclusive marketing rights to the services.

RE: U.S. Patent Application for:
"METHOD AND SYSTEM FOR PROVIDING LOCATION-SENSITIVE CALL
MANAGEMENT SERVICES TO A MOBILE SUBSCRIBER"
Your Ref. No.: 1674
Our Ref. No.: 60,434-002;

[REDACTED]

[REDACTED]

Dear Jafar:

I have enclosed a draft of the above-identified patent application for review by you as well as your co-inventors, including informal drawings to expedite the review process. Formal drawings will be prepared prior to filing the Application.

Please carefully review the application at your earliest convenience for accuracy and completeness. Keep in mind that we must disclose the best mode known for practicing the invention at the time of filing. Under the law, the best mode must further be disclosed in a way that would enable one of ordinary skill in the art to practice the invention without undue experimentation.

Mr. Jafar Nabkel

October 4, 1999

DECLARATION PURSUANT TO
37 C.F.R. §1.131

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

DECLARATION PURSUANT TO 37 C.F.R. §1.131

Sir:

I, Matthew Jacobs, am acting as the Representative of Karen Siegel-Jacobs' Estate under 37 C.F.R. §1.42, and declare that the following is true to the best of my knowledge and/or that I know of no facts that would contradict the following:

1. Karen Siegel-Jacobs, my deceased wife, was a co-inventor of the subject matter of the referenced patent application.

2. Prior to September 20, 1999, she participated in the conception of the subject matter of the above-described application (hereinafter "the invention"), as evidenced by Exhibits A through B. Exhibit A is an Invention Disclosure signed by all inventors and three witnesses. Exhibit B is a letter dated August 13, 1999, forwarding that disclosure to outside counsel instructing preparation of the subject patent application.

3. From at least a date prior to September 20, 1999, and continuing until November 18, 1999, the constructive reduction to practice of the invention, the inventors were diligent in reducing this invention to practice by, among other things, reviewing the draft patent application provided by outside counsel on October 4, 1999, as evidenced by Exhibit C.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code, and that such willful false statements may jeopardize the validity of the above-referenced application or a patent issued therefrom.

Respectfully submitted,

Matthew Jacobs

NOTE: This form, and other information on patents, is available on The U S WEST Law Department home page at <http://www.uswsis.uswest.com> (select "Law Department", "Intellectual Property", and "Patent"). It is also available on the file server at U S WEST Advanced Technologies, Inc., and in hard copy from the Law Department.

INVENTION DISCLOSURE

DIRECTIONS

Complete EVERY ITEM. If any item is not applicable or unknown, please indicate.

All inventors should sign the form (Item 14), as well as two witnesses (Item 15) and your supervisor (Item 16).

Send the completed, ORIGINAL form to the U S WEST Law Department - Intellectual Property Group, 7800 East Orchard Road, Suite 490, Englewood, CO 80111. You may FAX the form (FAX No. 303-793-6563), but please also send the original. If you have any questions, contact the Law Department at 303-793-6276 or 303-796-6030.

Since patent rights can be lost by public disclosure, please keep your invention confidential until advised otherwise by the Law Department.

- (1) **Invention Title.** Give a short (10 words or less) descriptive title of the invention.

A location-sensitive method and system for providing call management services to a mobile subscriber.

- (2) **Invention Summary.** State what you regard as the key invention concept (30 words or less).

Mobile phone subscribers could be provided with call management services that are sensitive to their current geographic location; e.g., a Do Not Disturb feature that is automatically activated when subscribers are near their residence.

- (3) **Purpose and Problems Solved.** Briefly state why the invention was developed, what problems it solves and the advantages it has over existing products or processes.

With the emerging PCS networks, mobile phone subscribers are more "in touch". One Number Services allow subscribers to be reached wherever they physically are. At the same time, mobile handsets can be used for both personal and work purposes. This continuous

CONFIDENTIAL - ATTORNEY/CLIENT PRIVILEGED

communications, however, may result in too many calls to some subscribers and an encroachment on the subscribers' personal or work life.

This invention describes a method and system to provide call management services that operate based on the location of the subscriber's mobile handset. Call Management services include, for example, Do Not Disturb, call screening, caller identification, special billing arrangements, or call forwarding types of services.

- (4) **Description.** Describe the invention and/or attach a description, drawing(s), flow chart(s) and/or diagram(s), if available.

The following diagram shows a wireless network comprised of a wireless handset, a pair of base stations (BS), a mobile switch, and a (pair of) Wireless Service Location Registers (WSLR)TM. The WSLR is described elsewhere, but for the purposes of this invention, it is a network computer containing both Home Location Register (HLR) applications and Location Management applications. The mobile switch may consist of numerous components, including a Base Station Controller, a Mobile Switching Center, and a Visiting Location Register.

The handsets communicate with Base Stations using radio frequencies. Two common digital protocols for this radio connectivity are Code Division Multiplexed Access (CDMA) and Time Division Multiplexed Access (TDMA). The Base Stations communicate with the mobile switch using a base station protocol such as IS-634 or similar. The mobile switch communicates with the WSLR using a signaling protocol such as IS-41 or GSM MAP.

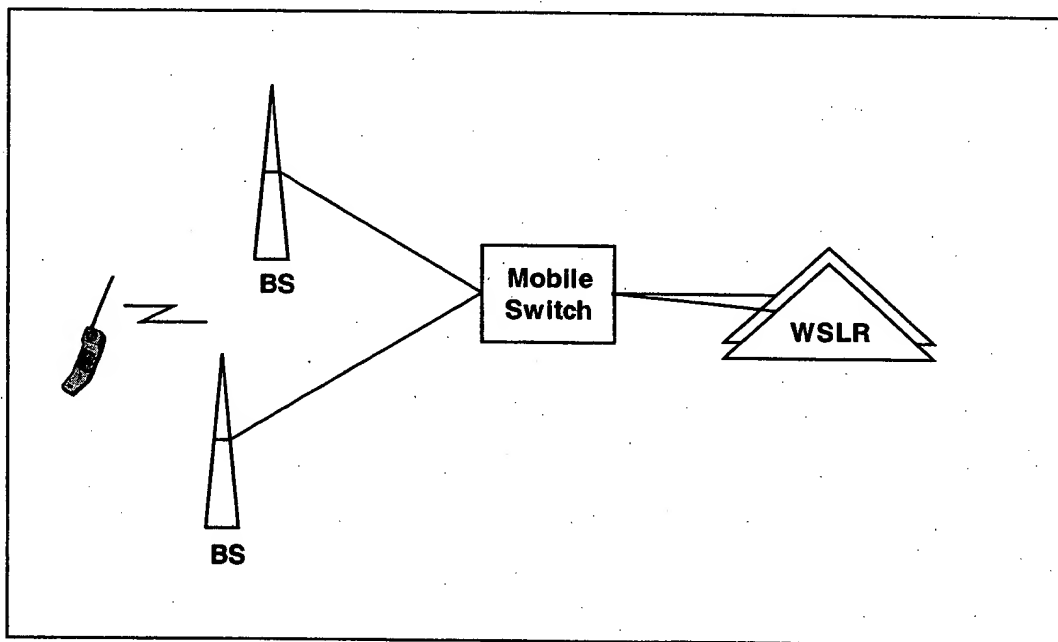

Figure 1: System for Providing Location-Sensitive Services

The method disclosed here teaches that call management services may be applied to incoming calls to the subscriber's handset or to outgoing calls from the subscriber's handset. Handset location information is either: 1) continuously furnished to the WSLR from either the network or from the subscriber's handset, or 2) provided to the WSLR upon request. This location

information may be determined from a variety of techniques well described elsewhere. Two examples are triangulation of radio signals by the base stations or using Global Positioning Systems (GPS) receivers located in mobile handsets.

When incoming calls are placed to the subscriber's handset, a signal (e.g., Location Request) is sent from the mobile switch to the WSLR requesting instructions on how to route the call. The WSLR accesses internal customer profiles to determine if the subscriber's handset is presently located within a geographic region where call management services for that subscriber apply. If so, the WSLR responds to the mobile switch with call processing instructions. For example, a Do Not Disturb service may instruct the switch to present an announcement to calling party stating that the subscriber is unavailable to receive calls at the moment.

When outgoing calls are placed from the subscriber's handset, a signal (e.g., Origination Request) is sent from the mobile switch to the WSLR requesting instructions on how to route the call. The WSLR accesses internal customer profiles to determine if the subscriber's handset is presently located within a geographic region where call management services for that subscriber apply. If so, the WSLR responds to the mobile switch with call processing instructions. For example, a caller identification service may replace the handset's caller identification with the subscriber's office telephone number when the handset is in the vicinity of the subscriber's office location.

Subscribers may specify the geographic regions where call management services apply in a number of ways. Some ways are by specifying a radius from specific point, a latitude/longitude grid, a list of ZIP codes, or a list of census tracts. This specification can be accomplished several techniques, including manual specification, use of Geographic Informations Systems (GIS), or by automated entry from the handset. An example of the first technique might be supplying a list of ZIP codes to the WSLR operator. An example of the second technique might be outlining a rectangle using a map over a Web-based GIS. An example fo the third technique might be pressing a key on the handset to identify a one-kilometer radius circle from the subscribers current location.

(5) **Business Area.** Check the business area that best fits your invention.

(6) **Responsible U S WEST Entity.** Provide the name of the U S WEST Division/Subsidiary having responsibility for the invention. This is usually the organization in which the inventor (or majority of inventors) is employed.

U S WEST Advanced Technologies

(7) **U S WEST Project Name or No.**

- a. Under what U S WEST project name or number was work done which resulted in the invention?

b. If the project was funded by organization(s) other than the responsible organization in Item 6 above, please name that organization(s).

- (8) **Conception Date.** When was the invention first conceived? Please list any records (engineering notebook, memos, etc.) which establish such conception.

The invention was first discussed on [REDACTED] Documented in Integrated Services Architecture subgroup meeting.

- (9) **Prototype or Model.** Has a prototype/model been built? If so, when was it built and where is it now?

No prototype or model has been constructed yet.

- (10) **Related Items.** Are there any existing products, processes, patents or U S WEST invention disclosures similar or which may relate to the invention? If so, please list them.

U S WEST has a patent on Do Not Disturb, and Remote Access to Call Forwarding. The WSLR has been described in several patents including Integrated Wireline/Wireless services, Generic C architecture, and Answer/Disconnect supervision.

- (11) **Sale or Public Use.** Has this invention been sold, offered for sale or publicly used (field trial, etc.) or is such sale or use anticipated? If so, please supply actual or anticipated dates.

The product has not been offered to the public yet.

- (12) **Publication or Disclosure.** Has the invention been disclosed in a publication or disclosed to anyone outside U S WEST or is such disclosure or publication anticipated? If so, supply actual or anticipated dates.

No.

- (13) **Commercial Value.** Briefly outline the potential commercial value of the invention (e.g., likelihood of use by others, licensing potential, etc.).

The commercial value to U S WEST lies with a potential commercial offering of location-sensitive services. With the patent application, U S WEST may choose to license the intellectual property to other equipment suppliers, to other network operators, or to retain exclusive marketing rights to the services.

Re: U S WEST Invention Disclosure for Case 1674
Patent Application Preparation

Dear Rhonda:

Enclosed is a copy of an invention disclosure and associated documents for which U S WEST would like Howard & Howard to prepare and file an application. The particulars are as follows:

Our Case: 1674
Title: A LOCATION-SENSITIVE METHOD AND SYSTEM FOR PROVIDING
CALL MANAGEMENT SERVICES TO A MOBILE SUBSCRIBER
Inventor(s): Edward A. Youngs
Donald E. Gillespie
Jafar Nabkel
Harvey J. Benson
Karen Seigel-Jacobs
U S WEST Entity: U S WEST Adv. Tech./Wireless
Deposit Acct. No.: 21-0456
U S WEST Attorney: Mark A. Thomas
Client Billing Code: ATI-0049

Please let me know if you need anything further.

Very truly yours,
